---

## PROFESSIONAL SUMMARY

Mechanical Engineering student at Redeemer's University (CGPA 4.32/5.00) seeking SIWES industrial placement in oil and gas, manufacturing, or energy engineering — available July–August 2026. Hands-on fabrication experience from SWEP 2025: SMAW welding, lathe operations (turning, facing, threading to  $\pm 0.05$  mm tolerance), milling, drive system alignment, and precision measurement. Led chassis fabrication of a petrol-powered Maize Sheller achieving 50 kg/hr design throughput. Proficient in AutoCAD 2D/3D, Python/NumPy engineering tools, and React.js/Firebase production systems. Sole developer of digital infrastructure serving 611 registered delegates across 10+ institutions — zero data loss. Speaker-Elect, RUNSA Legislative Council 2026/2027. SPE member (Energy & Fossil Fuels Committee).

---

## TECHNICAL SKILLS

**Manufacturing & Fabrication:** SMAW Welding (mild steel), Lathe Operations (turning, facing, threading,  $\pm 0.05$  mm tolerance), Milling (surface, shoulder, keyway), Drive System Alignment, Precision Drilling & Reaming, Angle Grinding, Metal Fabrication & Structural Assembly, Precision Measurement (Vernier calipers, micrometers)

**Engineering Design & Software:** AutoCAD 2D/3D (technical drawings, isometric projections, assembly views), Python & NumPy (engineering calculations), Git/GitHub, React.js, Firebase

**Core Engineering:** GD&T Fundamentals, Tolerance Analysis, Engineering Analysis & Calculations, Material Selection & Specifications, Technical Documentation & Reporting, Power Transmission (pulley-belt systems), Blueprint Reading & Interpretation, Fluid Mechanics & Aerodynamics, HSE Compliance & Workshop Safety, Process Optimisation, Root Cause Analysis

**Professional:** Technical Report Writing, AI Workflow Optimisation, Parliamentary Governance, Program Coordination, Stakeholder Management, Public Speaking, Adaptability under Pressure

---

## EDUCATION

**Redeemer's University** — Ede, Osun State

Oct 2023 – Present

*Bachelor of Engineering (B.Eng.) in Mechanical Engineering*

- CGPA: 4.32 / 5.00
- Relevant Coursework: Engineering Thermodynamics, Strength of Materials, Fluid Mechanics, Engineering Materials, Engineering Drawing & CAD, Introduction to Python Programming, Workshop Practice (SWEP), Engineering Mathematics IV

**Yaba College of Technology Secondary School** — Lagos

Sep 2016 – Jul 2022

*West African Senior School Certificate (WAEC)*

- Distinctions in Further Mathematics, Geography, and Technical Drawing

**SAT** — College Board

March 2023

- Total: 1360/1600 — 90th Percentile nationwide | Math: 710/800 (92nd Pct) | Reading & Writing: 650/800 (85th Pct)

---

## PRACTICAL EXPERIENCE

**Student Work Experience Program (SWEP)**

2025

*Industrial Fabrication & Workshop Training | Mechanical Engineering Dept., Redeemer's University, Ede*

- Performed cylindrical turning, facing, and threading on mild steel using lathe; selected cutting tools and calibrated feeds and speeds to achieve dimensional tolerances within  $\pm 0.05$  mm — verified against engineering specifications using Vernier calipers and micrometers.
- Conducted milling operations including surface milling, shoulder milling, and keyway cutting; applied correct workpiece clamping procedures and measured outputs against engineering specifications.

- Led structural fabrication of petrol-powered Maize Sheller Machine: interpreted engineering drawings, SMAW-welded mild steel angle iron load-bearing frame, performed drive system alignment, and configured pulley-belt power transmission — delivered functional prototype meeting 50 kg/hr design throughput specification.
- Co-designed and constructed low-speed open-circuit Wind Tunnel Apparatus: analytically calculated contraction cone geometry using continuity and Bernoulli equations, fabricated transparent acrylic test section, integrated pitot-static instrumentation, and validated uniform velocity profiles in the test section — demonstrating applied fluid mechanics at lab scale.
- Maintained strict adherence to workshop HSE protocols and PPE requirements across all fabrication activities.

---

## PROJECTS

### RUNSA Legislative Summit 2026 — Digital Infrastructure

Mar – Apr 2026

*Sole Developer | React.js · Firebase Realtime Database · Vercel | AI-Assisted Development*

- Architected and deployed 3 production web applications within 10 weeks to serve 611 registered delegates across 10+ institutions — implemented real-time cross-device synchronisation, automated badge generation, and admin dashboard with CSV/XLS export; zero data loss across the full event lifecycle.
- Deployed live check-in system used by 600+ attendees on summit day (29 April 2026, Sapetro Lecture Theatre, RUN); system handled concurrent multi-device access with no downtime or data collision.

### Beam Deflection Automator | Python Engineering Tool

2025

- Built Python tool automating structural beam deflection and slope calculation via Double Integration Method (NumPy); reduced per-beam hand-calculation time from ~40 minutes to under 4 minutes — adopted by 15+ coursemates for Strength of Materials coursework, eliminating propagation errors across all load configurations tested.

### Maize Sheller Machine | Trainee Fabricator

SWEP 2025

- Led structural fabrication of petrol-powered agricultural shelling machine: SMAW-welded mild steel angle iron load-bearing frame, performed drive system alignment, configured pulley-belt power transmission, and verified mechanical integrity of all joints and assemblies — functional prototype met 50 kg/hr design throughput.

### Wind Tunnel Apparatus | Builder & Designer

SWEP 2025

- Co-designed and constructed low-speed open-circuit wind tunnel for aerodynamic research: calculated contraction cone geometry analytically from first principles (continuity equation + Bernoulli), fabricated acrylic test section, and integrated pitot-static instrumentation to measure velocity profiles and validate Bernoulli's principle.

---

## LEADERSHIP & EXTRACURRICULAR

### Speaker-Elect — RUNSA Legislative Council

May 2026 – Present

*Redeemer's University Student Association | Incoming Speaker, 2026/2027 Session*

- Elected Speaker of the RUNSA Legislative Council for the 2026/2027 academic session — the highest student legislative office at Redeemer's University; will chair all plenary sessions and represent the Council at institutional level.

### Chief Whip & In-House Committees Supervisor — RUNSA Legislative Council

Oct 2025 – Present

*Redeemer's University Student Association | Student Government*

- Enforced parliamentary procedure and maintained session discipline as Chief Whip across 15+ legislative council sessions, representing ~1,200+ undergraduate students; supervised all four In-House Committees, set reporting standards, and tracked action items from motion to resolution.
- Coordinated as sole developer of complete digital infrastructure for RUNSA Legislative Summit 2026 (611 delegates, 3 live production applications, zero data loss).
- Recipient: Chief Whip Award — RUNSA Legislative Council, 2025–2026 Academic Session.

### Redeemer's University Protocol Team (RPT)

Jan 2026 – Present

*Probation Officer (Jan–May 2026) → Main Teams Officer (May 2026–Present)*

- Selected through competitive screening from a pool of applicants; promoted to Main Teams Officer within five months on the basis of consistent performance and professional conduct.
- Manage protocol coordination, event logistics, and stakeholder communication across hybrid and on-site engagements.

#### **Campus Ambassador — Cowrywise Fintech**

*Dec 2025 – Present*

*Redeemer's University Campus | Financial Literacy & Outreach*

- Designed and facilitated Club60 financial literacy sessions for 20+ students per cohort on personal savings, budgeting, and investment fundamentals; drove 15% growth in campus platform registrations within one semester through structured peer-to-peer outreach.

#### **Campus Ambassador — Campor | Student Ambassador — Haayaa**

*Dec 2025 / Feb 2026 – Present*

- Represent two student-focused digital platforms on campus; lead peer awareness campaigns, onboarding drives, and user engagement initiatives for the Redeemer's University student community.

#### **Society of Petroleum Engineers (SPE) — RU Chapter**

*Aug 2024 – Present*

*Energy & Fossil Fuels Committee | Environment, Nature & Climate Action Committee | International*

- Engage with technical literature and industry speakers on upstream oil and gas operations, drilling engineering, reservoir mechanics, and energy economics; contribute to discussions on Nigeria's energy sector, environmental compliance, and the just energy transition.

---

### **CERTIFICATIONS**

- Purpose-Driven AI: Introduction to Artificial Intelligence — Faith Leads University / Grow with Google, May 2026 | Cert No: 8487641051OI
- HP LIFE / HP Foundation (May 2026): AI for Business Professionals · Critical Thinking in the AI Era · Effective Leadership · Social Entrepreneurship · Design Thinking · Business Email
- Fundamentals of Programming — Programming Hero, 2020

---

### **AWARDS & HONORS**

- Chief Whip Award — RUNSA Legislative Council, 2025–2026 Academic Session
