

IBUKUNOLUWA OLUWAFEMI

Mechanical Engineering Student

📍 Lagos, Nigeria 📞 +234 708 057 2415 ✉️ oluwafemiibk@gmail.com 🌐 [Ibukunoluwa Oluwafemi](#)

Professional Summary

Dedicated Mechanical Engineering student with hands-on experience in industrial fabrication, machining operations, and engineering design. Proficient in operating workshop machinery including lathe, milling, and drilling machines, with practical welding skills acquired through intensive Student Work Experience Program (SWEP). Combines technical manufacturing expertise with emerging programming capabilities in Python and CAD design. Seeking opportunities to apply mechanical engineering knowledge and practical workshop skills in real-world engineering environments.

Education

Redeemer's University

Ede, Osun State

Bachelor of Engineering (B.Eng.) in Mechanical Engineering

Oct 2023 – Present

- CGPA: 4.37/5.00
- **Relevant Coursework:** Engineering Thermodynamics, Strength of Materials, Engineering Materials, Fluid Mechanics, Engineering Mathematics, Student Workshop Practice, Introduction to Python Programming, Engineering Drawing & CAD

Yaba College of Technology Secondary School

Lagos

West African Senior School Certificate (WAEC)

Sep 2016 – Jul 2022

- Distinctions in Further Mathematics, Geography, and Technical Drawing

Technical Competencies

Manufacturing & Fabrication:

- Shielded Metal Arc Welding (SMAW) – Arc welding of mild steel structures
- Lathe Machine Operation – Turning, facing, threading operations
- Milling Machine Operation – Surface milling and slot cutting
- Drilling Machine Operation – Precision hole drilling and countersinking
- Angle Grinder Operation – Metal cutting, grinding, and surface finishing
- Metal Fabrication – Structural chassis assembly and alignment
- Precision Measurement – Vernier calipers, micrometers, steel rulers

Engineering Design & Software:

- AutoCAD (2D/3D) – Technical drawings, isometric projections, assembly drawings
- Python Programming – Basic automation, numerical computations, data handling (NumPy)
- HTML/CSS – Basic web markup and styling
- Git/GitHub – Version control fundamentals

Core Engineering Skills:

- Engineering Calculations & Analysis • Material Selection & Specifications
- Technical Documentation • Blueprint Reading & Interpretation
- Workshop Safety & Best Practices

Soft Skills:

- Public Speaking & Presentation
- Team Collaboration & Leadership
- Problem-Solving & Critical Thinking
- Time Management & Adaptability

Practical Experience

Student Work Experience Program (SWEP) Participant Redeemer's University

Workshop Training

200 Level, 2024

- Completed intensive hands-on training in workshop operations, operating lathe machines for cylindrical turning and threading operations on metal workpieces
- Performed milling operations including surface finishing and keyway cutting using milling machines
- Executed precision drilling operations with proper workpiece clamping and tool selection
- Applied Shielded Metal Arc Welding (SMAW) techniques to join mild steel components for fabrication projects
- Utilized angle grinders for metal cutting, edge preparation, and surface grinding
- Actively participated in the fabrication of a Maize Sheller Machine, contributing to chassis assembly by welding mild steel angle irons and ensuring structural integrity
- Collaborated with engineering team to design and construct a Wind Tunnel Apparatus for fluid mechanics testing, calculating contraction ratios and assembling transparent test sections
- Demonstrated proficiency in workshop safety protocols, proper tool handling, and adherence to engineering specifications throughout all fabrication projects

Academic Projects – SWEP

Maize Sheller Machine

Fabrication Team Member

- Participated in chassis fabrication during Student Work Experience Program capstone project
- Welded and assembled structural components using mild steel angle irons for load-bearing base frame
- Contributed to drive system alignment for 2HP electric motor integration with proper belt tensioning
- Collaborated with team to deliver functional agricultural equipment prototype

Wind Tunnel Apparatus

Fluid Mechanics Project Team

- Contributed to design and construction of experimental wind tunnel for aerodynamic testing
- Participated in contraction cone ratio calculations to ensure smooth flow transition
- Assisted in assembly of transparent test section using acrylic sheets for flow visualization
- Worked with team to integrate fan assembly and measurement instrumentation

Beam Deflection Calculator

Personal Programming Project

- Developed Python script to automate beam deflection calculations using Double Integration Method
- Implemented mathematical formulas for structural analysis applications in coursework
- Applied programming logic to solve practical engineering calculation problems

Leadership & Extracurricular Activities

Cowrywise Campus Ambassador

Dec 2024 – Present

Remote/Campus-Based

- Promote financial literacy initiatives and savings culture among university students
- Organized "Club60" financial education sessions for campus community

Chief Whip, RUNSA Legislative Council

Oct 2024 – Present

Redeemer's University Student Government

- Enforce parliamentary procedures and maintain order during legislative sessions
- Coordinate communication between council members and uphold legislative standards

Student Member, Society of Petroleum Engineers (SPE)

2024 – Present

Redeemer's University Chapter

- Participate in technical sessions on energy resources and engineering ethics
- Engage with industry professionals during chapter meetings and seminars

Certifications

Fundamentals of Programming

Issued 2020

Programming Hero

- Covered fundamental programming concepts: data structures, loops, conditionals, and algorithms
