PROFESSIONAL SUMMARY

Mechanical Engineering student at Redeemer's University (CGPA 4.32/5.00) seeking SIWES industrial placement in the oil and gas or energy sector. Hands-on fabrication, machining, and mechanical systems experience from SWEP: SMAW welding, lathe operations, milling, drilling, and precision measurement. Demonstrated capability in engineering analysis, technical documentation, and drive system alignment through project work. Proficient in AutoCAD 2D/3D for engineering drawings and Python for engineering calculations. Supported deployment of production-grade digital infrastructure for 611 delegates at the RUNSA Legislative Summit 2026 — zero data loss. Strong communicator with proven leadership in a formal governance environment. Available to commence SIWES/internship placement between July and August 2026.

EDUCATION

Redeemer's University — Ede, Osun State *Oct 2023 – Present*

Bachelor of Engineering (B.Eng.) in Mechanical Engineering

- CGPA: 4.32 / 5.00
- Relevant Coursework: Engineering Thermodynamics, Strength of Materials, Fluid Mechanics, Engineering Materials, Engineering Drawing & CAD, Introduction to Python Programming, Workshop Practice (SWEP), Engineering Mathematics

Yaba College of Technology Secondary School — Lagos *Sep 2016 – Jul 2022*

West African Senior School Certificate (WAEC)

- Distinctions in Further Mathematics, Geography, and Technical Drawing

SAT — College Board *March 2023*

- Total: 1360/1600 — 90th Percentile nationwide | Math: 710/800 (92nd Pct) | Reading & Writing: 650/800 (85th Pct)

TECHNICAL SKILLS

Manufacturing & Fabrication: SMAW Welding (mild steel), Lathe Operations (turning, facing, threading), Milling (surface, shoulder, keyway), Precision Drilling & Reaming, Angle Grinding, Metal Fabrication & Structural Assembly, Drive System Alignment, Precision Measurement (Vernier calipers, micrometers)

Engineering Design & Software: AutoCAD 2D/3D (technical drawings, isometric projections, assembly views), Python & NumPy (engineering calculations), Git/GitHub, React.js, Firebase

Core Engineering: Engineering Analysis & Calculations, Material Selection & Specifications, Technical Documentation & Reporting, Power Transmission (pulley-belt systems), Blueprint Reading & Interpretation, Workshop Safety & HSE Compliance

Professional: Team Collaboration, Technical Report Writing, AI Workflow Optimisation, Parliamentary Governance, Program Coordination, Public Speaking, Adaptability under Pressure

PRACTICAL EXPERIENCE

Student Work Experience Program (SWEP) — Redeemer's University *2024*

Industrial Fabrication & Workshop Training | Mechanical Engineering Department, Ede, Osun State

- Operated lathe machines to perform cylindrical turning, facing, and threading operations on mild steel workpieces; selected appropriate cutting tools and set feeds and speeds to achieve dimensional accuracy
- Conducted milling operations including surface milling, shoulder milling, and keyway cutting; applied correct workpiece clamping procedures and measured outputs against engineering specifications using Vernier calipers and micrometers
- Led chassis fabrication team for petrol-powered Maize Sheller Machine: interpreted fabrication drawings, SMAW-welded mild steel angle iron structural frame, aligned petrol engine, and configured pulley-belt power transmission system — delivered functional prototype at 50 kg/hr throughput
- Contributed to design and construction of low-speed Wind Tunnel Apparatus: applied Bernoulli's principle and continuity equation to calculate contraction cone ratios analytically, assembled transparent acrylic test section, and integrated fan assembly with measurement instrumentation for aerodynamic flow visualisation
- Maintained strict adherence to workshop health, safety, and environment (HSE) protocols, proper PPE usage, and engineering specifications across all fabrication activities

PROJECTS

RUNSA Legislative Summit 2026 — Digital Infrastructure *Jan – Apr 2026*

Sole Developer | React.js · Firebase · Vercel | AI-Assisted Development

- Designed and deployed 3 independent production web applications in under 10 weeks to support a 611-delegate multi-institution academic summit; applied structured problem-solving and project management principles to deliver on time with zero data loss
- Built real-time data management, cross-device synchronisation, and automated document generation systems — demonstrating capacity to apply engineering and analytical thinking to complex, multi-stakeholder operational challenges

Beam Deflection Automator | Python Engineering Tool *2024*

- Developed Python script applying the Double Integration Method to automate structural beam deflection and slope calculations; reduced manual lab computation time by over 90% and eliminated propagation errors — adopted by coursemates for Strength of Materials coursework

Maize Sheller Machine | Lead Fabricator*SWEP 2024*

- Led structural fabrication of petrol-powered agricultural shelling machine: SMAW-welded mild steel angle iron load-bearing frame, configured pulley-belt drive transmission, and verified mechanical integrity of all joints and assemblies — 50 kg/hr throughput on functional prototype

Wind Tunnel Apparatus | Builder & Designer*SWEP 2024*

- Co-designed and constructed low-speed open-circuit wind tunnel for aerodynamic research: calculated contraction cone geometry analytically, fabricated acrylic test section, and integrated instrumentation to measure velocity profiles and demonstrate Bernoulli's principle

LEADERSHIP & EXTRACURRICULAR

Chief Whip & In-House Committees Supervisor — RUNSA Legislative Council*Oct 2024 – Present*

Redeemer's University Student Association, Ede | Student Government

- Enforce parliamentary rules of order and maintain procedural discipline during legislative council sessions attended by student representatives from across the university community
- Supervise all In-House Committees: set reporting standards, ensure procedural compliance, coordinate inter-committee communication, and track action items from session to resolution
- Coordinated as sole developer of complete digital infrastructure for RUNSA Legislative Summit 2026 (611 delegates, 3 live production applications, zero data loss)
- Recipient: Chief Whip Award — RUNSA Legislative Council, 2025–2026 Academic Session

Redeemer's University Protocol Team (RPT)*Jan 2026 – Present*

Probation Officer (Jan–May 2026) → Main Teams Officer (May 2026–Present) | Hybrid / On-site

- Selected through competitive screening from a pool of applicants; promoted to Main Teams Officer within five months on the basis of consistent performance, reliability, and professional conduct
- Manage protocol coordination, event logistics, and communication tasks across hybrid and on-site engagements; develop practical skills in planning, stakeholder management, and professional representation

Campus Ambassador — Cowrywise Fintech*Dec 2024 – Present*

Redeemer's University Campus | Financial Literacy & Outreach

- Design and facilitate Club60 financial literacy sessions on personal savings, budgeting, and investment fundamentals for undergraduate students; grew campus platform registrations by 15% within the first semester through targeted peer-to-peer outreach

Campus Ambassador — Campor | Student Ambassador — Haayaa*Dec 2025 / Feb 2026 – Present*

- Represent two student-focused digital platforms on campus; lead peer awareness campaigns, onboarding drives, and user engagement initiatives for the Redeemer's University student community

Society of Petroleum Engineers (SPE) — RU Chapter*Aug 2024 – Present*

Energy & Fossil Fuels Committee | Environment, Nature & Climate Action Committee | International

- Engage with technical literature and industry speakers on upstream oil and gas operations, drilling engineering, reservoir mechanics, and energy economics; contribute to discussions on Nigeria's energy sector, environmental compliance, and the just energy transition
